REPORT ON: TASK REPORT

TASK NO: 03

TITLE:

IMPLEMENTATION REFLECTION & TEST COVERAGE AUDIT

1. Implementation Summary

Two features were implemented in the Art Space app:

1. **Next Artwork Button** – displays the next artwork in the gallery.
2. **Favourite Toggle Button** – allows users to add artworks to a favourites list.

2. Test Coverage Audit Table

Component	Has Test	Type of Test	Coverage Status	Priority	Comments
Next Button	Yes	UI Test	Good	High	Interaction verified
Favourite Toggle	Yes	Unit Test	Good	High	State update tested
Orientation Change	No	UI Test	Needs Improvement	Medium	State resets
Artwork Loading	No	Unit Test	Needs Improvement	Medium	Missing logic test

3. Testing Coverage Diagram

4. Edge Case / Bug Discovery

One possible issue occurs when the device orientation changes. The application may reset to the first artwork if the state is not saved correctly. A new test should verify that the current artwork index remains the same after device rotation.

5. Reflection

Writing tests changed my perspective on application development by emphasizing reliability and correctness. Testing ensures UI behavior matches expected results and helps detect bugs early. In future implementations, I will structure code to make testing easier and more maintainable.
